

ENDOMED 484

Allround 4-channel electrostimulator

Suitable for electro **acupuncture**

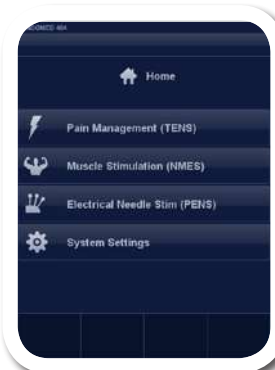

The ENDOMED 484 is a new generation high-performance electrostimulator for the health professional who wants it all:

- **TENS (Transcutaneous Electrical Nerve stimulation)** for Pain management
- **NMES (Neuromuscular Electrical Stimulation)** for Muscular stimulation and re-education
- **PENS (Percutaneous Electrical Nerve Stimulation)** for Electro-acupuncture and Acupoint stimulation

The 4 channels can be used separately, in pairs or at the same time with different programs.

The ENDOMED 484 therefore is the ultimate solution for the treatment of painful conditions and muscle impairment in Stroke Rehab (incl. Dysphagia), Orthopaedics, Sport Rehab and Pelvic Floor reeducation (incontinence).

ELECTROTHERAPY

Equipment for pain management and muscle stimulation. Electrotherapy applications for fast pain relief without side effects. Muscles can be stimulated to improve the function of soft tissue. Electrotherapy can be used to measure differentiated tissue response to stimulation.

ENDOMED 484

1498981 ENDOMED 484

TECHNICAL SPECIFICATIONS

Power supply 100–240V, 50/60 Hz, max. 100 VA
Dimensions device (WxDxH): 24 x 28,6 x 9,3 cm
Dimensions device with base: 24 x 30,5 x 18,2 cm
Weight: 2,5 kg
Weight, including optional battery: 3,5 kg

Number of channels: 4 (100% independent)
Intensity: 0–140 mA (in steps of 0.1 mA)
Output: Constant Current
Timer: 0–90 min (in steps of 1 min)

Current wave forms (TENS/NMES/PENS):
• Asymmetrical biphasic pulsed current (net zero)
• Symmetrical biphasic pulsed current (net zero)
• Symmetrical biphasic pulsed current with Interphase Interval (net zero)

Pulse duration: 10–1000 μ s (for symmetrical biphasic pulsed current) and 5–450 μ s (for asymmetrical biphasic pulsed current)

Range of interphase interval: 0–250 μ s
Frequency: 0.5 – 200 Hz
Modulation frequency: 0 – 180 Hz
Modulation programs: 1/1, 3/3, 6/6, 12/12, 30/30 and 60/60s

TENS stimulation modes:
• High Frequency TENS
• Low Frequency TENS (Acupuncture Like)
• Burst Frequency TENS
• Modulated TENS: Frequency Modulation (FM), Pulse Width Modulation (PWM) and Amplitude Modulation (AM)

NMES stimulation modes:
• Single channel stim
• Dual channel stim: synchronous, asynchronous and alternating (reciprocal)
• Multi channel stim: synchronous, asynchronous, alternating and PEMS (Progressive Electrical Muscle Stimulation)

Active rest stimulation
(fixed frequency of 8 Hz during resting period): yes
ON/OFF time: 0 – 120s
Ramp UP/DOWN time: 0 – 10 s
Delay time: 0.1 – 120 s

PENS stimulation modes:
• High Frequency Electroacupuncture
• Low Frequency Electroacupuncture
• Burst Frequency Electroacupuncture
• Modulated Electroacupuncture: Pulse Width Modulation (PWM), Amplitude Modulation (AM), HAN Stimulation

Programmable positions: 1000+
Sequential programs: Max. 15 phases

STANDARD ACCESSORIES ENDOMED 484

	1498740	CD-ROM with Instructions For Use (PDF on CD-ROM)
	1498742	Information Booklet
	3444290	Mains cable 230V-EUR
	1498010	Device base (inclination support)
8x	xxxxxxx	self-adhesive electrode (EN-Trode) 5x5 cm, 2 mm female
8x	xxxxxxx	self-adhesive electrode (EN-Trode) 5x9 cm, 2 mm female
4x	3444211	Patient cable 2-core & 2 mm male plugs - black, with colour clips
	3444180	Point Electrode, 2mm female connector, incl. 10 silicone conductive caps
2x	3444182	Crocodile clamp with 2 mm female connector (set of 2)

ENDOMED 484

TENS

(Transcutaneous Electrical Nerve stimulation) is a method of electrical stimulation for pain relief in acute and chronic conditions. The ENDOMED 484 includes multiple forms of TENS as an option: Conventional (high frequency) TENS, Acupuncture-like (low frequency) TENS, Burst TENS and Modulated TENS. The different methods of applying TENS relate to the different physiological mechanisms for pain modulation. TENS is non-invasive and has few side effects when compared with drug therapy.

NMES

(Neuromuscular Electrical Stimulation) is used to promote muscle strengthening and functional recovery of extremities (upper and lower limb). The ENDOMED 484 allows the user to work with single, dual or multi-channels and offers synchronous, asynchronous and alternating (reciprocal) stimulation for muscles or muscle groups. Besides these stimulation modes, the ENDOMED also features PEMS (Progressive Electrical Muscle Stimulation). This unique function is extremely beneficial in Functional Electrical Stimulation (FES) since it ensures that all four channels stop simultaneously, regardless of the contraction patterns of each channel. PEMS is highly desirable for muscle stimulation in a kinetic chain (e.g. in stroke rehab).

PENS

(Percutaneous Electrical Nerve Stimulation) is a proven and effective analgesic therapy which combines the advantages of both TENS and Electro-acupuncture. In PENS the current is delivered to the body by utilizing small acupuncture-like needles positioned in soft tissues and/or muscles for the relief of pain and improvement in functionality in patients with for instance migraine, neuropathic pain, sciatica and chronic knee pain. Electro-acupuncture and related techniques are effective for acute and chronic pain, and reduces some side effects. This minimal invasive procedure is rapidly growing in popularity as the results are excellent. Some even consider it the ultimate combination of Dry Needling and TENS.

Endomed 484 ... 4 Pain Management and 4 Muscle Stimulation

Endomed 484 ... 4 Performance and 4 Versatility

Endomed 484 ... 4 you!

PENS: 'Electrical Dry Needling'

ENRAF-NONIUS

ENDOMED 484 FEATURES

12 **Evidence-Based** protocols
(6 TENS, 4 NMES and 2 PENS)
including the display of
the anatomic localizations and
the treatment instructions.

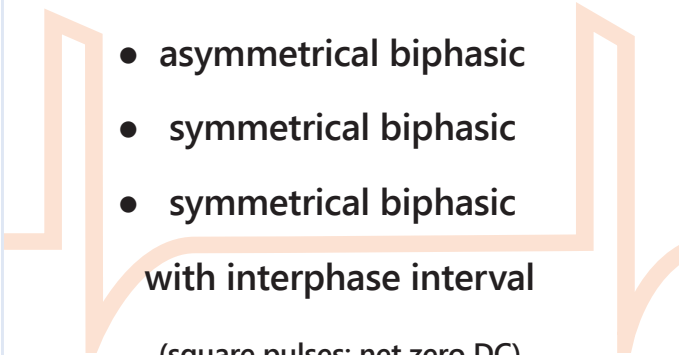

4 Fully independent channels for
the simultaneous stimulation of
up to 8 needles/electrodes

Current wave forms:

- asymmetrical biphasic
- symmetrical biphasic
- symmetrical biphasic
with interphase interval

(square pulses; net zero DC)

Intensity can be regulated
separately for each channel

Pulse durations up to **1000** μ s

1000

Quick Access to

Evidence Based parameters,
even in manual mode

Location: Lumbar
Goal: pain reduction
Sessions: varies with each individual case.
Intensity: limited to 2 mA (up to just perceptible).
Treatment area: 2 large (adult) electrodes (5x13 cm) and positioned paravertebrally at the low back.

Powerful

current output up to 140 mA
(peak per channel)

Modulation modes:

- Frequency (FM)
- Pulse Width (PWM)
- Amplitude (AM)

FM PWM AM

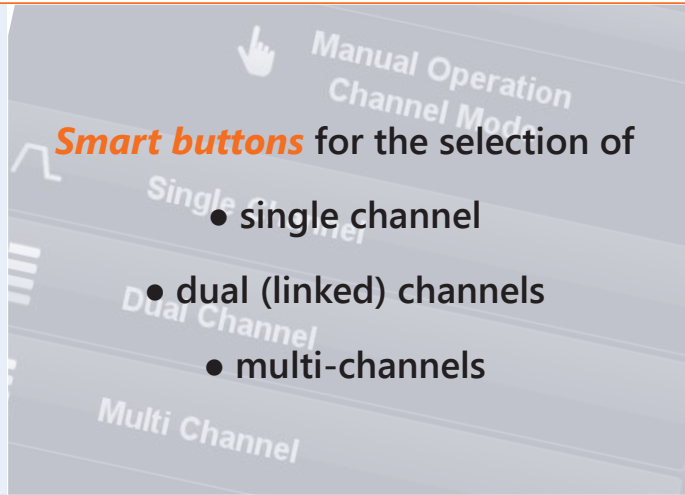

ENDOMED 484 FEATURES

Smart Buttons for selection of

- frequency
- pulse width
- modulation mode

Smart buttons for the selection of

- single channel
- dual (linked) channels
- multi-channels

PEMS
Progressive Electrical Muscle
Stimulation
an **unique function** for
Functional Electrical Stimulation

AUTO

AUTO-mode for
Frequency and Pulse Duration
(available in certain programs)

Clinical Guidelines & Evidence Based **protocols incorporated**,
providing the user with recommendations for the effective treatment
of pain and various musculoskeletal disorders

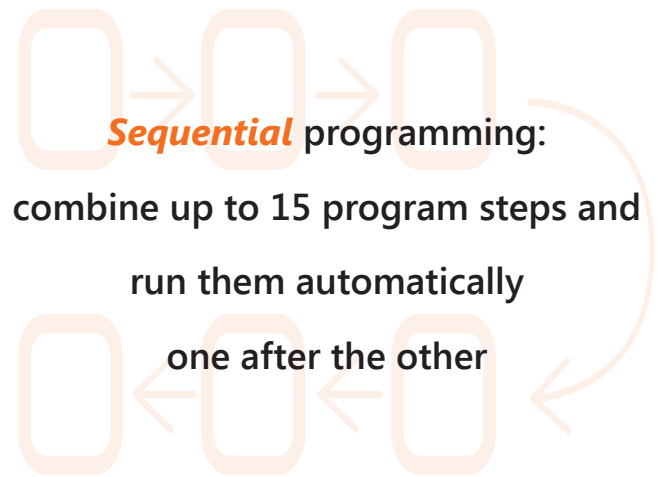

Active Rest button:
starts electrical stimulation
during the rest phase
for the prevention of muscle **atrophy**

1000

Stores up to **1000** favorites

ENDOMED 484 FEATURES

Programming function:
enables the user to define
personalized programs
and store them as favorites

Safe and comfortable:
the biphasic nature of the waveforms
minimize any skin reaction
due to the build-up
of electrolytes under the electrodes

Easy-to-use

Compact & stylish
light weight device
can be used mobile

High resolution
full-color touchscreen

Mains *powered*
or
battery powered
(optional)

ACCESSORIES ENDOMED 484

ELECTRODES AND MOIST PADS

ADHESIVE ELECTRODES

3444222	Adhesive electrodes Ø 2,2 cm, 2 mm female, 10 sheets of 8 (also for EMG)
3444056	EN-Trode Ø 3,2 cm, 2 mm female, 10 sheets of 4
3444135	EN-Trode Ø 5,0 cm, 2 mm female, 10 sheets of 4
3444057	EN-Trode 5x5 cm, 2 mm female, 10 sheets of 4
3444058	EN-Trode 5x9 cm, 2 mm female, 10 sheets of 4

RUBBER ELECTRODES

3444128	Rubber electrodes 4x6 cm, 2 mm female, set of 2.
3444129	Rubber electrodes 6x8 cm, 2 mm female, set of 2
3444130	Rubber electrodes 8x12 cm, 2 mm female, set of 2

MOIST PADS FOR RUBBER ELECTRODES

1460273	Moist pads for rubber electrodes 4x6 cm, set of 4
1460266	Moist pads for rubber electrodes 6x8 cm, set of 4
1460275	Moist pads for rubber electrodes 8x12 cm, set of 4

FIXATION STRAPS

3444020	Strap 100x3 cm
3444021	Strap 250x3 cm
3444022	Strap 100x5 cm
3444023	Strap 250x5 cm

POINT ELECTRODES

3444180	Point electrode (pen model), 5 mm Ø, 2 mm female, incl 10 conductive rubber caps
3441181	Silicon conductive caps (set of 10 pcs) for 3444.180

ADAPTERS

2523524	Adapter plug, 2 mm female, 4 mm male, red
2523523	Adapter plug, 2 mm female, 4 mm male, black
3444182	Crocodile clamp with 2 mm female connector (set of 2)

PATIENT CABLES

3444211	Patient cable 2-core & 2 mm male plug - black, with coloured clips
