

ORIONMED

Bath tub for body relaxation and healing massage

combined bubble and whirlpool underwater massage

anatomically shaped bath basin

electronic control

intended for use at:

- natural therapy centres
- hydrotherapy wards
- wellness facilities
- home rehabilitation

ORIONMED

The bath features three different types of hydrotherapy treatment:

- whirl massage using 36 directional water jets divided in 3 independent sections (section 1: legs, section 2: hips and thighs, section 3: back)
- underwater massage by water jets with stepless water pressure control
- air bubble massage based on a system of apertures located in the bath's bottom, with adjustable intensity and mode of treatment (constant or variable with saw or square characteristics) and ozone generator

Features:

- touch-screen control panel with backlit display
- 36 water nozzles, 3 independent massage zones, 2 independent pumps
- nozzle ridge for massaging internal parts of lower limbs
- air bubble massage blower
- underwater manual massage hose with 3 replaceable nozzles
- optional underwater jet massager (on/off tap, manual intensity control, pressure gauge, 3 interchangeable nozzles)
- ozone generator for air bubble whirlpool massage function
- RGB LED lamps with colour setting option
- treatment timer with countdown option and end of treatment sound alarm
- pump „dry-run“ protection
- optional water heater (maintains preset water temperature)
- water temperature indicator (shows temperature inside tub and water supply system)
- can use warm or cold water from the water supply system built-in disinfection and descaling program (forced and uninterrupted disinfection process, low disinfectant level indicator, descaling indicator)
- automatic filling with “bath full” sound indicator and water level indicator (3 sensors, 2 levels)
- made of high quality acrylic reinforced with polyester laminate
- 4 sides of the tub protected with panels
- stable aluminum frame

Basin color:

- white
- calypso green (optional)

LED-RGB lamp

Additional features:

- chromotherapy with modern, durable RGB-LED lamps with built-in controller
- water drainage via manual valve in 4 minutes
- automatic disinfection of the hydro massage system
- high-quality antibacterial acrylic tub

Options:

- heater
- jet hose

TECHNICAL DATA:

Power consumption [kW]:	5,7
Hydro massage section pump power [kW]:	1,8
Blower motor power [W]:	800
Electric water heater power [kW]:	1,5
Water jet pressure up to [bar]:	4
Capacity [l]:	300
External dimensions (LxWxH) [mm]:	2140 x 850 x 950
Supply voltage [VAC / Hz]:	230 +- 10% / 50
